

Communication

Date	12 July 2026
Team ID	
Project Name	Credit Card Approval Prediction
Maximum Marks	1 Mark

Communication Plan:

Effective communication is essential for a successful project demonstration. This document outlines the communication strategy used within the team and with stakeholders throughout the project lifecycle, including how updates, issues, and feedback were managed.

S. No	Communication Type	Frequency	Channel / Tool	Participants	Purpose
1	Team Standup	Daily	WhatsApp / Google Meet	All team members	Quick sync on progress and blockers across data prep, modeling, and the Flask app.
2	Progress Update	Weekly	Google Meet	All team members	Review milestone progress (data pipeline, model tuning, frontend, deployment).
3	Issue / Bug Discussion	As Needed	WhatsApp	Relevant members	Resolve blockers such as feature-vector mismatches or model loading errors.
4	Stakeholder Review	Bi-Weekly	Google Meet	Team + mentor/reviewer	Get feedback on model metrics, UI, and overall project direction.
5	Final Demo Rehearsal	Once	Google Meet	All team members	Rehearse the live application demo and Q&A responses before presentation day.
6	Documentation Review	As Needed	Shared Drive	All team members	Cross-check project documentation (requirements, tech stack, scalability plan) for accuracy.

Communication Challenges & Resolutions:

S. No	Challenge Faced	Resolution / Action Taken
1	Mismatch between the feature columns used at training time and the columns built by <code>build_feature_vector()</code> at inference time.	Standardized on loading <code>feature_columns_v3.pkl</code> at startup and building the request DataFrame with that exact column order.
2	Coordinating schedules across team members working on data, modeling, and the web app in parallel.	Moved to a fixed weekly progress-update slot and used a shared task tracker to keep milestones visible to everyone.
3	Disagreement on how much detail to disclose about model limitations on the result page.	Agreed as a team to prioritize transparency — the result page now states the model's actual precision/recall so

S. No	Challenge Faced	Resolution / Action Taken
		predictions aren't overstated.
