

Project Demo Planning

Date	12 July 2026
Team ID	
Project Name	Credit Card Approval Prediction
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S. No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Explain the manual credit-approval evaluation problem, its delays and inconsistency, and why an ML-based predictor helps.	2	Member 1
2	Data & Feature Engineering Walkthrough	Show the application_record/credit_record data sources, the vintage-analysis label fix, and derived features.	3	Member 2
3	Model Development & Results	Present the baseline comparison, cross-validated tuning, and final XGBoost metrics ($F1 \approx 0.41$, threshold = 0.29).	3	Member 3
4	Live Application Demo	Submit sample applicant profiles through the web form and show real-time Approve/Reject predictions.	4	Member 4
5	Result Page & Disclosure Walkthrough	Highlight the approval-probability gauge and the precision/recall disclosure panel that keeps the tool honest.	2	Member 5
6	Scalability & Future Plan	Summarize current limitations and the roadmap (cloud deployment, retraining pipeline, authentication, explainability).	2	Member 1

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Set the business context: manual credit-approval review is slow and inconsistent.
2	Solution Overview	Introduce the Flask + XGBoost architecture and the end-to-end data flow.
3	Live Feature Demonstration	Run 2–3 applicant scenarios (approve, reject, borderline) through the live app.
4	Q&A Session	Address questions on model reliability, threshold choice, and the future roadmap.
